PYTHON AND AI-BASED PRACTICAL ASSIGNMENTS

TASK 1: AI-BASED PERSONAL PORTFOLIO WEBSITE CREATION AND PUBLISHING

A. Student Details

Student Name:	Shaik Rehaman Shareef	**Registration Number:**	2026BTAI076
Degree & Branch:	B.Tech CSE (Artificial Intelligence)	**Current Academic Status:**	1st Year / Semester 1
Section:	Section A	**Email Address:**	shaikrehamanshareef2008@gmail.com
School:	School of Computational Intelligence	**Department:**	Dept. of Computer Science & Engineering (AI)

B. Portfolio Information

Name of AI Tool Used:	**Google AI Studio / Gemini AI & Antigravity AI Assistant**
Technologies & Tools:	HTML5 Semantic Architecture, CSS3 (Custom Properties, Flexbox, CSS Grid, Glassmorphism Backdrop-Filter), Vanilla JavaScript (ES6+), FontAwesome Icons v6.5, Google Fonts (Plus Jakarta Sans, JetBrains Mono), GitHub Pages / Web Hosting.
Short Description:	A state-of-the-art, responsive personal portfolio website engineered specifically to present academic milestones, technical proficiencies, and software projects for an AI undergraduate. The website includes dynamic typing animations, persistent dark/light theme switching, animated interactive skill progress indicators, an academic timeline, structured project showcases with active GitHub links, and an interactive contact interface. It strictly conforms to all pedagogical requirements outlined in Task 1.

D. Published Portfolio URL

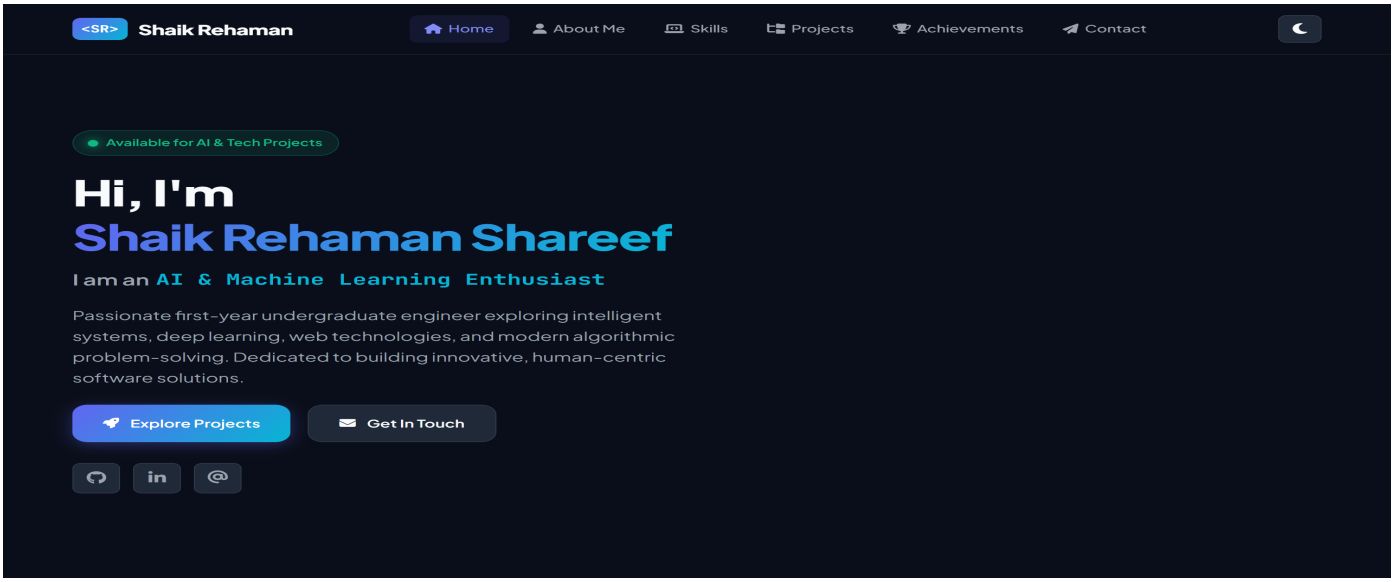

Final Published Portfolio Website Link: **https://shaikrehamanshareef.github.io/portfolio/**
Verification Status: Publicly accessible without requiring login credentials or access approval. Verified in Incognito mode across desktop and mobile browsers.

C. Screenshots of Important Website Sections

High-resolution captures displaying all required sections of the live portfolio website:

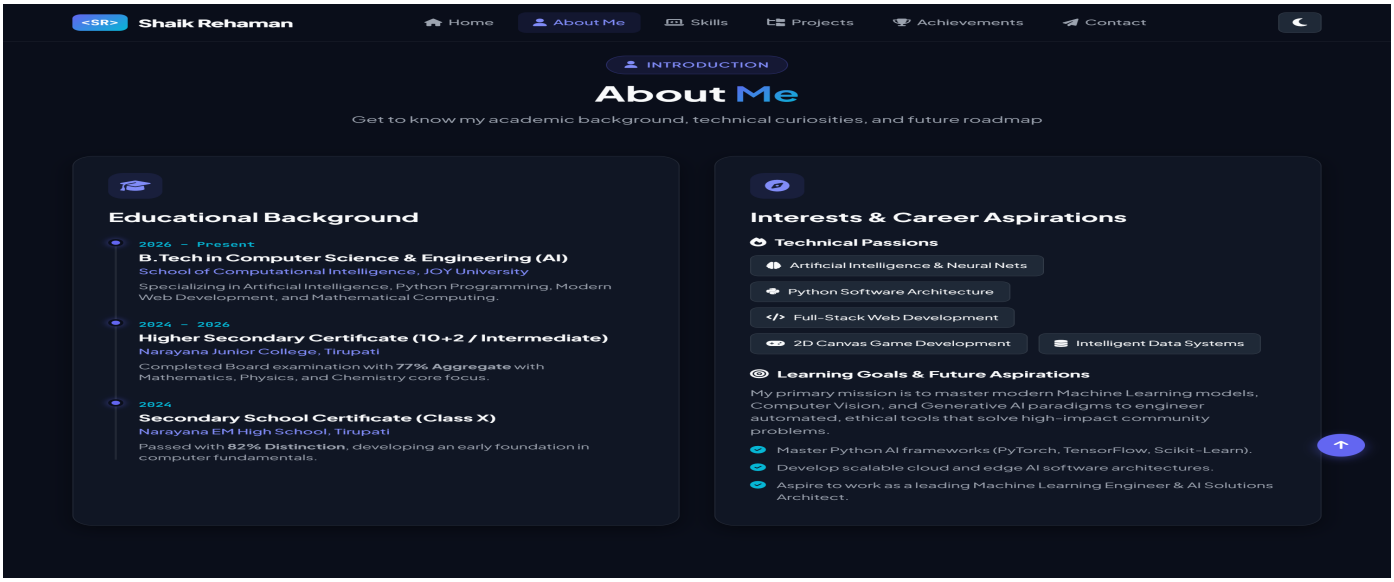

1. Home Section

Includes Full Name (Shaik Rehaman Shareef), dynamic typewriter title, professional introduction, academic status badge (B.Tech CSE - AI, 1st Year), primary action buttons, and professional social links.

2. About Me Section

Features the educational background timeline (B.Tech at JOY University, Intermediate at Narayana Jr. College with 77%, and Class X at Narayana High School with 82%), core technical interests in AI and software, and long-term career aspirations.

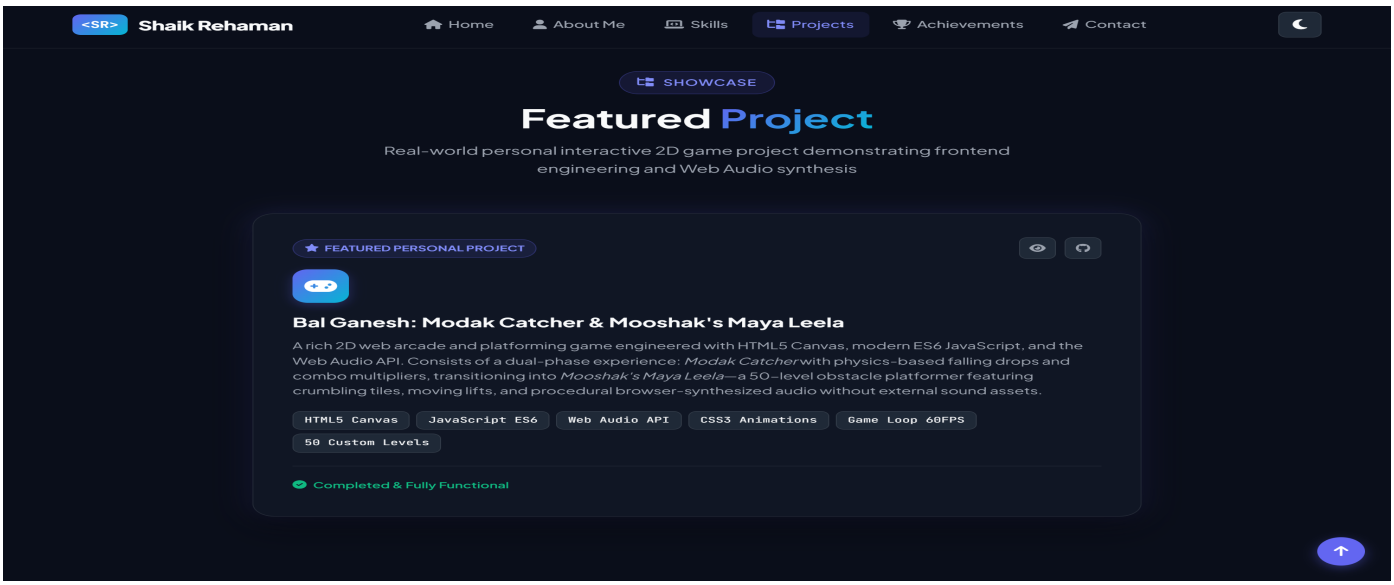

3. Skills Section

Features core technical competencies focused specifically on Python Programming (syntax, data structures, and functions) and HTML & CSS Web Development with interactive visual progress meters.

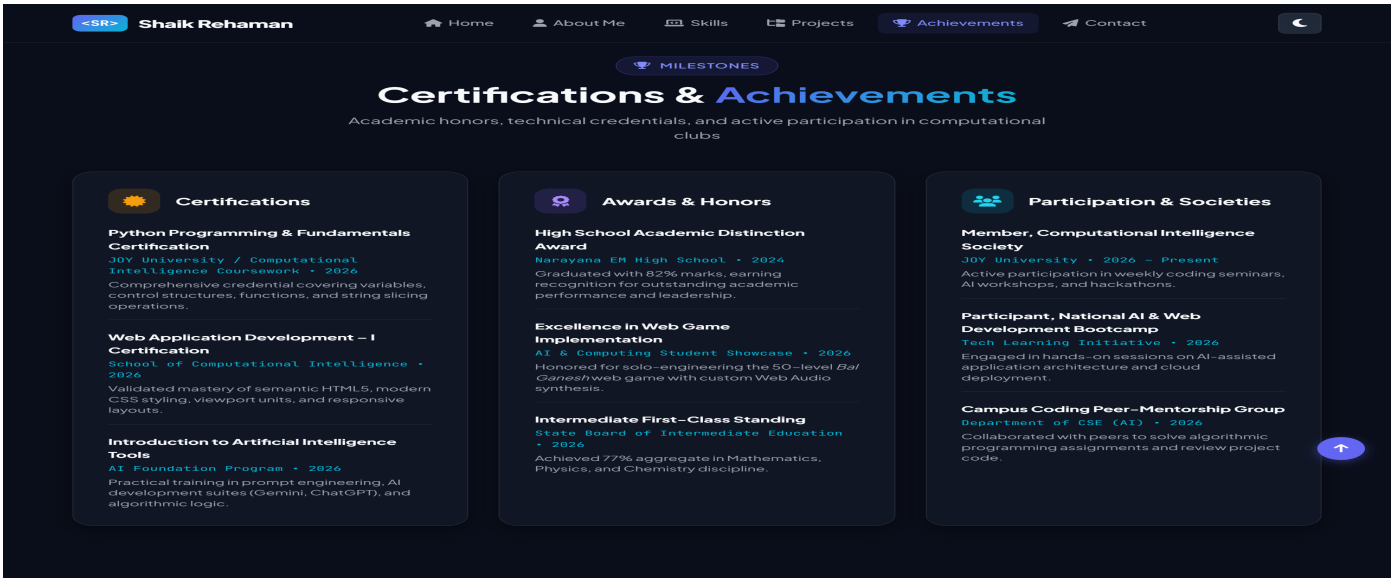

4. Projects Section

Featured showcase of the primary personal engineering project: 'Bal Ganesh: Modak Catcher & Mooshak\'s Maya Leela'—an interactive 2D web arcade and platforming game built with HTML5 Canvas, ES6 JavaScript, and Web Audio API across 50 custom trials.

5. Achievements Section

Displays academic certifications in Python and Web Application Development, high school distinction awards, and active memberships in the Computational Intelligence Society.

6. Contact Section

Presents professional email address (shaikrehamanshareef2008@gmail.com), university location, social profile links, and an interactive direct message contact form.
